NARRATIVE

Follow-Up

Author: **JENSEN, ALLAN**

Rpt date: **Dec 16, 1999 2:01PM**

Appvd: **053**

I contacted Dr Richard Tucker, DDS and requested his assistance in reviewing the dental work on the skeleton located in GP Stack # 9 in 1987. I obtained the full skull from impound and met with Dr. Tucker. He looked at the teeth and determined that by the wear on the teeth, he felt that the victim was between 40 and 45 years old at the time of his death. Dr. Tucker said that the subject had good teeth and received fairly quality dental care. Both front teeth were capped with porcelain caps and gold fillings behind the caps. I asked if he could determine anything unusual about any of the dental work that might help identify who may have performed the work or assist with the identity of the victim. Dr. Tucker advised that there was nothing at he could see at this time that might assist. He suggested that I contact Dr. Sweet at the University of British Columbia who is a forensic dentist for further assistance.

Investigation to continue.

Appvd: **072**

I received the attached FAX from Det. Jeff Hawkins, Gastonia Police Department advising that the dental records that were sent to him do not match those of their open missing person case.

I also spoke with Det. Sgt Snover at Clallam Co. SO again about their open missing person case. He indicated that he had located the case file and their victim was last seen about Jan 1987. His physical description was similar to that of the skeletal remains found here and was suffering from a possible mental condition. Sgt Snover indicated that family members felt that the missing person had wandered into the mountains and disappeared. There were no dental records included in the case file, but family members of the missing person are still in the area. I requested that Sgt. Snover send me a copy of their case file which he said he would do. I also asked that he include current address for any family members so I could contact them.

Investigation to continue.

Appvd: **127**

The attached results from the NCIC off line search were faxed to me. In reviewing the open missing person cases listed, Number one and two are both missing as result of boats sinking in Alaska. Number three could be a possible match and is a missing person on file with the Alaska State Troopers in Soldotna, Alaska. Number four is also a possible and is on file with the sheriffs office in Weaverville, California. Number five has the dental records listed for the missing person and they do not match our dental records on file. Number six was also eliminated because the date of last contact listed is after the discovery date of the skeletal remains. Number seven is a possible case of interest through Gastonia Police Department in Gastonia, North Carolina. Number eight dental records on the NCIC list do match those on file in this case. Number nine and number ten both list a date of last contact after our discovery date.

The attached letters were sent to the three agencies that noted possible matches. I included a copy of the dental records with the letters and requested that they check the referenced cases against these records.

Investigation to continue.

I received a phone call from Det. Jeff Hawkins, Gastonia Police Department concerning my letter that was sent in reference to this investigation. According to Det. Hawkins he had a local dentist review the dental records that I had sent and felt they may be a possible match to an open missing person case in that jurisdiction. I FAXed Det Hawkins a copy of the dental sheet completed by Dr Farrell and dated 10-16-87 that has a more complete description of the dental work for the recovered skeletal remains. DEt Hawkins also requested a copy of the case file which I requested records mail to Det. Hawkins.

Rpt date: **Feb 16, 2000 10:16AM**

Appvd: **111**

A report was file on 10-28-93 indicating that a Det Matt Dalton, Clallam Co. SO had called indicating that his agency had an open missing person case involving a Norman Boullion who had been reported missing in Feb. 1987 under case number 87-01827. According to the follow up, Boullion had been in the military and Evidence Supervisor Nolte advised that at the time the remains were checked, it was felt that some of the dental work may have been done in a military clinic. Nothing on file showed if Boullion had been eliminated as a person of interest.

I contacted the Clallam Co SO and found that Det Dalton no longer worked for the agency and talked with Detective Sgt. Snover concerning the case. He advised that the case was still open but he did not know if it included any type of dental records. I explained to him the information about the skeletal remains and requested any information on their open investigation. He advised that he would attempt to find the case file and call back with any information.

Det. Sgt. Snover - 360-417-2544

Investigation to continue.

Author: **JENSEN, ALLAN**

Rpt date: **Feb 18, 2000 2:46PM**

Appvd: **111**

I received the attached copy of the Clallam Co SO missing person report for Norman Boullion. I was also provided with the name of Linda Smith who is a step sister to the missing and may be able to provide additional details. I contacted Linda Smith and she related that the last time Boullion was seen was about Aug 1986 when he left the Clallam County area saying that he was going to California to link up with an old girlfriend. Linda Smith said that Boullion mother is still alive, Olga Boullion, and lives at 3204 Durango St, Apt. A, Tacoma, Wash., 98409 - phone number 253-383-4757.

I checked the Clallam County report and found that a request had been sent for dental records for Boullion through the military, but no indication if they were ever received. I contacted the Bellingham FBI office and through their office they made contact with the military records center in St Louis, Mo. Agent Powers was able to confirm that records were on file for Boullion and could be obtained through a written request. I requested a letter asking for the dental records be sent under Chief Carroll's signature.

Investigation to continue.

Rpt date: **Mar 07, 2000 1:21PM**

Appvd: **127**

I received a phone call from Det Nick Tranquilla, 530-623-8105, with the Trinty County SO in Weaverville, California concerning my letter dated 2-9-2000. He had checked their open missing person case under event number 87-2901 for comparison to our open missing person case. According to Det Tranquilla they had no dental records for their missing person. He was a 26 year old white male at the time of his disappearance. Det Tranquilla said that he was described as being a white male, about 5'8" tall, 155 pounds with Hazel eyes and shoulder length brown hair. Det Tranquilla said that the report indicated that the subject left after a domestic argument but there was no mention of any vehicle or possible destination. There was nothing in the report to indicate any ties to the Washington State area or reason for the subject to travel here. The report also indicated that another subject had seen the missing person walking along a local river and that was the last observation of him. It does not appear that this open missing person case is related to the skeltal remains found at G.P.

Investigation to continue.

87B-24528 DEATH INVESTIGATION

NARRATIVE

Follow-Up

Author: **JENSEN, ALLAN**

Rpt date: **Apr 04, 2000 9:01AM**

Appvd: **072**

I received the dental records for NORMAN BOULLION (R1) from the Seattle Veterans Affairs Office. The records included x-rays from 1967 and 1970 as well as the attached written records. I took the dental records to CHARLES FARRELL (C2) who had conducted the exam on the skeletal remains in 1987 and noted the dental records. CHARLES FARRELL (C2) reviewed the dental records and x-rays and determined that they did not match the skeletal remains found at GP. I contacted LINDA SMITH (R2) the step sister of NORMAN BOULLION (R1) and advised her of this information. I will forward a copy of the dental records to STEVEN SNOVER (C3) with the Clallam County Sheriffs Department to be included with their missing person case file on NORMAN BOULLION (R1).

All of the previous possible missing persons located through the NCIC off line search have been eliminated. I contacted NCIC again and requested another off line search using the same physical description but using the missing dates of 01011986 through 12311986 and 01011988 through 12311988. NCIC advised that this information would be faxed to me once the inquiry was completed.

I also contacted Marlyin Fitzpatrick with the Toronto Police Department and provided her with the background of the investigation and requested that she run an off line search through Canada for missing persons reported and matching the description of the skeletal remains. I faxed Fitzpatrick the search information.

At the request of the Veterans Affairs Department, I sent the actual x-rays for NORMAN BOULLION (R1) back to the Seattle office.

Investigation to continue.

Rpt date: **Feb 21, 2002 2:31PM**

Appvd: **111**

INVESTIGATION:

2-21-02 - I contacted United States Customs offices in Blaine and inquired if a search could be done by name for border crossings in 1986 and 1987. I gave Customs the name and date of birth of Harrington, David G - DOB 01-02-1958 on the off chance that he was contacted by Customs if he crossed the border from BC to the US. I used the dates of 1986 since that was the last time Harrington family had seen him. US Customs completed a check of their records and showed that Harrington had not been contacted crossing the border during that time frame. Customs advised that their records only showed subjects who were identified by Customs inspectors and it was still possible that Harrington could have crossed the border and not been documented by Customs.

The last time I spoke with Det Dan Dickhout, Vancouver BC PD, he indicated that he was going to contact the family members of Harrington and get a blood sample from Harrington mother for DNA testing. To date I have not heard back from him.

Investigation to continue.

INVESTIGATION:

8-21-02 - The Washington State Patrol Identification Section provided the attached list of current open missing person cases where the physical description matches that of the skeletal remains found at Georgia Pacific. One of the three possible records noted was that for Norman Boullion which has already been eliminated. Another possible match was listed under the name of Dana Torgeson from Steven County. I contacted the Steven County Sheriffs department record section and inquired about the open case. They advised that Dana Torgeson was missing one arm. This eliminated this open missing person record. The last missing person case listed is that of Robert Keenan reported through the King County Sheriffs Department. I contacted the Missing Person Unit but no one was in the office until the first week of September.

I also attempted to contact Det Dan Dickout, Vancouver BC PD concerning his inquiry into obtaining a blood sample from David Harrington mother. Det Dickout was out of the office until the first week in September also.

Investigation to continue.

INVESTIGATION:

2-27-03 - Det. Dickhout, Vancouver BC PD transferred the skull back to me after the attempted reconstruction. The skull was returned to evidence. He advised that the family members of DAVID HARRINGTON (R3) had agreed to provide a blood sample for a DNA comparison and he was arranging to collect this sample and would then make arrangements to transfer the sample to our agency for submission along with the recovered remains to the crime lab.

Investigation to continue.

INVESTIGATION:

5-10-04 - Samples of the skeletal remains had previously been sent to the Washington State Crime lab by the Evidence unit. I received a telephone call from Crime Lab employee, William Stubb that the samples were nothing but dust when they were opened at the crime lab. We discussed the other items that were in impound concerning this case and William Stubb requested that additional bone samples be sent as well as the complete skull and teeth. We also talked about the open case involving the missing person from Vancouver BC. William Stubb advised that if we could obtain a DNA sample from family members of DAVID HARRINGTON (R3), he could then make a comparison if he obtained any DNA samples from our evidence items will be used to check for possible DNA. I sent an email to Evidence and ID supervisor Haye requesting that these items be forwarded to the crime lab.

I also contacted the Vancouver BC Police Department Missing Person Unit. Since Det. Dan Dickhout had retired from service, I spoke with Sgt John Druggani, unit supervisor. I explained to him the investigation to this point and the interest in their open investigation involving DAVID HARRINGTON (R3). I requested assistance in obtaining the needed DNA sample from DAVID HARRINGTON (R3) family members. Sgt Druggani indicated that he would review the open case file and assign a new investigator to the case.

Investigation to continue.

Rpt date: **Aug 09, 2004 10:01AM**

Appvd: **081**

INVESTIGATION:

8-9-04 - On this date I received from Evidence and ID Supervisor Hayes the attached crime laboratory report concerning the skull submitted for DNA typing. According to the lab report there was no STR DNA typing profile obtained from the skull.

With the completion of the DNA testing there does not appear to be any additional follow-up that can be done to assist in the identification of the bones discovered. An NCIC off line search has been conducted and all missing persons reported in the United States within the time frame of the discovery have been eliminated. A search of the Canadian missing person file resulted in only one possible match from Vancouver BC. Vancouver BC PD assisted with the reconstruction of the recovered skull and this came back as inconclusive to matching the Vancouver missing person, DNA was the last possible avenue of matching the Vancouver BC PD missing person with this investigation.

The complete investigative case file was provided to Lt. Ambrose for final review and determination if the case should be closed and the remains released for burial.

Appvd: **121**

INVESTIGATION:

10-30-06 - The Bellingham Herald published a follow up article on the original story from 1987 concerning the skeleton located at G.P. Included in the article were the composite drawing done in 1987 and the second drawing completed in 2000. As result of this newspaper article, I received a telephone message from ROBERT ELVIS BROWN (C4) advising that he may have some information concerning the investigation.

I contacted ROBERT ELVIS BROWN (C4) by phone. He advised that in 1987 he was employed at Mt Baker Plywood mill. During one of his shifts, his foreman came through the plant with two other males, who were not employees at the plant. ROBERT ELVIS BROWN (C4) indicated that he assumed the two were friends of the foreman. ROBERT ELVIS BROWN (C4) said that he and one of the males talked about some of the things that they were interested in and what they did when not working. ROBERT ELVIS BROWN (C4) said that he mentioned to the male that he was a diver and it was during the conversation that the male said that he and some friends would climb the towers at G.P. for fun. The male told ROBERT ELVIS BROWN (C4) that one of the group worked at G.P. and this person would get them access to the plant after hours. They would then climb the towers throughout the plant and he explained that they had developed a warning system among themselves it they thought they had been seen. He related that one would blow a whistle and the others would then meet at a pre-arrange location to avoid being caught inside the plant. ROBERT ELVIS BROWN (C4) said that the male told him that the most recent addition to their group was a guy who had previously lived in New York state and on their last outing, when one of the group blew the whistle, this subject did not show up at the pre-arranged meeting location.

ROBERT ELVIS BROWN (C4) related that this conversation with the subject occurred after the discovery of the skeleton and the information about the investigation in the media. ROBERT ELVIS BROWN (C4) did not know the subjects name, but indicated that the foreman at the time was a man with the last name of Larsen.

ROBERT ELVIS BROWN (C4) indicated that he contacted a friend at the police department in 1987 with this information.

I contacted Mt. Baker Plywood and inquired about employees during the 1987 time frame. I was told that the only person who would know employees from that time frame was the Operations and Human Recourse Manager, Tim Shannon and he was off until November 7th. I left a message on his voice male requesting contact.

A copy of the Bellingham Herald article was submitted to records to be scanned into this case file.

KIRO TV also came to Bellingham and filmed a story for the evening news about the investigation. They were also provided with copies of the two drawings and aired both on the evening news broadcasts.

Investigation to continue.

Appvd: **114**

INVESTIGATION:

As result of the information received from ROBERT ELVIS BROWN (C4), I contacted the New York State Police and was directed to DANIEL D CRAVEN (C5) with the NYS - ViCAP Forensic Investigation Center. I explained our investigation and the information obtained with a possible connection to New York State. DANIEL D CRAVEN (C5) advised that he would search the New York State missing person for possible matches. This search was completed with no clear hits matching the time frame and physical description of our skeletal remains. DANIEL D CRAVEN (C5) then expanded the search criteria and obtained 5 possible's within the time frame of our investigation. Four of the missing person records were out of New York city and one from Suffolk County PD.

The following NIC case numbers were provided: M714799912, M274820862, M191690662, M544801452, and M244834755. The NCIC hits on each of these NIC case are attached to this report. None of the NCIC files showed any indication of dental records being a part of the missing person files. I contacted Det Rameriz, with the New York PD missing person / DOA unit. I provided him with the NIC numbers for each of the cases in question and asked they they be researched for possible dental records. Det Rameriz telephone number is 212-473-2042.

Copies of the 1987 and 2000 forensic drawing were emailed to DANIEL D CRAVEN (C5) for comparison against any photos in the New York missing person files.

Lt Simon also received an email from Sgt Anna-Maria Williams, East Investigative Unit, Metro Nashville Police Department (615-862-7559) indicating that a citizen had reported that the drawings released to the press looked similar to a missing person from Nashville. This report, NIC M627248887, Les Pasquelle Woodward was reported as missing or last seen in 1987. The NCIC record for this missing person did not have any dental records attached. I contacted Sgt Williams and requested the file be checked for possible dental records. Attached is a copy of the photo of Woodward from the Nashville Police department web site. Also attached is a copy of the NCIC hit for this missing person.

Investigation to continue.

87B-24528 DEATH INVESTIGATION

NARRATIVE

Follow-Up

Author: **JENSEN, ALLAN**

Rpt date: **Dec 28, 2006 2:34PM**

Appvd: **154**

INVESTIGATION:

11-3-06 - I met with Dr. Robert Gibb and Dean Kahn from the Bellingham Herald. Dean Kahn wanted to review the photos taken at the time the skeleton was found at GEORGIA PACIFIC WEST INC (R4). Dr Gibb, who was the deputy medical examiner in 1987, was present to explain what examinations he had conducted in 1987 to make a determination that the skeleton was that of a male victim. Included in the photos I obtained from Evidence and ID were photographs of Dr Gibb taking measurement of the pelvic bones. Dr Gibb indicated that these were the measurements used to determine that the skeleton was in fact that of a male. After reviewing the photographs Dr Gibb was confident that his original assessment that the skeleton was that of a male was correct.

On 11-29-06 an article was written by Dean Kahn after an interview with RICHARD H SEVERSON (C6) raising the question as to if the recovered skeleton could have been a female. In the newspaper article, RICHARD H SEVERSON (C6) described a female who he came in contact with at the Western Washington University steam plant and that he was concerned that this unidentified female could be related to the skeleton found at GEORGIA PACIFIC WEST INC (R4)

On this date I contacted RICHARD H SEVERSON (C6) by telephone. RICHARD H SEVERSON (C6) had been employed as a steam plant operator for Western Washington University, retiring from that position in 1993. He said that in the late summer of 1987 a female entered the steam plant in the late afternoon. RICHARD H SEVERSON (C6) indicated that the female said nothing to him, but he offered her a tour of the plant. He indicated that the female wanted to see the inside of a boiler, so he allowed her to go into a cold boiler, which he said she did about 5 or 6 times. RICHARD H SEVERSON (C6) said that he became somewhat nervous about the female and told her that if she wanted to see more steam plant operations she should go to GEORGIA PACIFIC WEST INC (R4). The female left the WWU steam plant, and according to RICHARD H SEVERSON (C6) it was after the discovery of the skeleton that he became concerned. RICHARD H SEVERSON (C6) said that he had spoken to the WWU police department about the female the next day, but she had committed no crime so there was no interest in the reason she had walked into the steam plant or her interest in the boilers.

RICHARD H SEVERSON (C6) described the female as being 35 - 40 years old, brown hair, blue eyes with a thin type build. She was 5'4" to 5'6" tall and about 130 pounds. She was wearing a wind breaker lined type jacket, blue jeans, a knitted type blouse or shirt and canvas type tennis shoes.

RICHARD H SEVERSON (C6) indicated that when he heard about the discovery of the skeleton in Sept. 1987, he immediately contacted the Bellingham PD. He said that he did not remember the names of the two detectives that he spoke to, but he did remember that his first contact was with employee Jack Visser. RICHARD H SEVERSON (C6) said that he was told by the two detectives that the recovered skeleton was that of a male and they were convinced that the female he had come in contact with had nothing to do with the investigation.

Attached to this report is a copy of the article written by Dean Kahn.

Appvd: **120**

INVESTIGATION:

On 2-26-07 I received information from the Doe Network of a possible match of a missing person case in Texas to the skeletal remains found at GP. The missing person was entered by Angelina County Texas. This missing person had been last seen in Alaska in 1987 and was to be traveling back to his home in Texas, but did not arrive and had not been heard from since that time. He was reported missing in 2000 by family members. The subject, Letney, Jackie Larry was entered into NCIC under NIC number M-740731961.

I contacted Angelina County SO and spoke to Dep Clayton and provided her with the information about this missing person case. I also faxed to her the dental records for the skeletal remains. Dep Clayton checked with family members and found that Letney had no dental work done, but as result of a gun shot wound the orbital bone on the right side of his face had been broken. Dep Clayton had X-rays showing this damage to Letney face. This did not match the skeletal remains recovered in 1987. Dep Clayton and I were both convinced that these remains were not that of Letney.

Carrie Shelton with the Washington State Patrol Missing Person unit contacted me concerning this investigation. She requested that the X-Rays from the case file be forwarded to her office. The dental X- Rays will be reviewed by Dr. Gary Bell, a forensic odontologist and then the dental records will be forwarded to the FBI's national data base. Dr Bell had requested that the original X-Rays be sent to his office so copies could be made. The originals will be returned to Bellingham PD in 3 to 5 weeks.

I pulled the X-Rays from the original case file in records and sent those to WSP. A copy of the email from Carrie Shelton was placed in the case file as a locator for the X-rays.

I received an email from the Washington State Patrol Missing and Unidentified Person Unit. As part of their services Forensic Odontologist Dr. Gary Bell had done a dental comparison from this investigation to a missing person report from Bloomington, In. According to Dr Bell report the dental records in the two cases did not match. I printed the documents completed by Dr Bell and submitted them to records to be included in this case file.

4. STATUS MPR	NAME BOULLION	6. PAGE NUMBER TWO			

INVESTIGATION: ON 02-17-87 AT APPROX. 1330 HOURS I WAS MET AT THE SHERIFF' DEPT. BY A LINDA SMITH OF 1494 SANDHAGEN RD. SMITH TOLD ME THAT SHE WANTED TO REPORT HER STEP-BROTHER AS A MISSING PERSON.

INTERVIEW WITH R/P SMITH: SMITH TOLD ME THAT SHE WAS REPORTING HER STEP-BROTHER, NORMAN J. BOULLION DOB/03-12-47, AS MISSING AT THE REQUEST OF HER ELDERLY STEP-MOTHER MRS. BOULLION OF 46109 DUTTON AVE., CHERRY VALLEY, CALIF. (714-845-8390).

SMITH TOLD ME THAT NORMAN BOULLION HAD BEEN LIVING IN THE PORT ANGELES AREA FOR THE LAST SEVERAL YEARS, BUT NORMAN' MOTHER LAST HEARD FROM NORMAN IN THE MIDDLE OF AUGUST 1986.

SMITH TOLD ME THAT DURING THE PERIOD OF TIME NORMAN BOULLION LIVED IN THE PORT ANGELES AREA, SMITH DID NOT HAVE MUCH CONTACT WITH BOULLION.

SMITH TOLD ME THAT SHE BELIEVES NORMAN' LAST ADDRESS AS BEING THE SHIMKO RESIDENCE ON BEAN ROAD. (948 BEAN RD.).

SMITH TOLD ME THE FOLLOWING INFORMATION ON NORMAN BOULLION; HE IS MARGINALLY MENTALLY HANDICAPPED, HE DOES NOT HAVE A DRIVERS LICENSE AND IS NOT KNOWN TO DRIVE, HE ONCE THREATENED SUICIDE OF THE PORT ANGELES 8TH ST. BRIDGE (P.A.P.D CASE # 85-18430), AND THAT HE HAS BEEN IN THE MERCHANT MARINES IN THE PAST. BOULLION ALSO HAS AN EX-WIFE NAMED MARTHA HERNANDES LIVING IN CALIFORNIA, ADDRESS UNKNOWN, AND THAT BOULLION HAS A SON THAT LIVES IN THE COUNTRY OF COLUMBIA, NAME OF SON UNKNOWN.

8. REPORTING OFFICER DAITON M.T.	9. REPORTING OFFICER SIGNATURE <i>[Signature]</i>	10. DATE 10-6-87	11. SUPERVISOR APPROVING	12. DATE

1. INCIDENT NUMBER 8701827		CLALLAM COUNTY SHERIFF'S DEPT. CONTINUATION REPORT		2. ORIGINAL X	3. SUPPLEMENT
4. STATUS MPR	5. NAME BOULLION	6. PAGE NUMBER THREE			

ACCORDING TO SMITH, BOULLION USUALLY HAS CONTACT WITH HIS MOTHER IN CALIFORNIA, EITHER BY TELEPHONE OR LETTER, SEVERAL TIMES A MONTH, BUT NORMAN'S MOTHER HAS NOT HEARD FROM HIM SINCE THE MIDDLE OF AUGUST 1986.

SMITH TOLD ME THAT SHE HAD CONTACTED MRS. SHIMKO AND SHIMKO TOLD SMITH THAT SHE BELIEVED THAT NORMAN HAD LEFT THE SHIMKO RESIDENCE AROUND SEPT. 1986 TO GO TO EITHER CALIFORNIA OR COLUMBIA.

SMITH DESCRIBED BOULLION TO ME AS FOLLOWS; 5'9", 160 LBS., BLACK HAIR GREYING AT THE TEMPLES, BLUE EYES, AND "SEMI BUCK TEETH". BOULLION DOES NOT HAVE ANY SCARS, MARKS, OR TATTOOS TO SMITH'S KNOWLEDGE.

SMITH DID NOT HAVE ANY FURTHER INFORMATION TO ADD.

INVESTIGATION: I DISCUSSED THIS CASE WITH MY SUPERVISOR, SGT. GATES, AND SGT. GATES INSTRUCTED ME TO "H.D.O." THIS CASE BECAUSE BOULLION HAD INDICATED HE WAS LEAVING THE AREA.

ON 09-28-87 I SAW AN ARTICLE IN THE PORT ANGELES DAILY NEWS REFERENCE THE UNSOLVED LINTON HOMICIDE IN JEFFERSON COUNTY WHICH STATED THAT THE LINTON HAD "VANISHED AUGUST 22, 1986" FROM JEFFERSON COUNTY. THE ARTICLE FURTHER DESCRIBED A SUSPECT IN THE CASE AND THE DESCRIPTION OF THE SUSPECT WAS SIMILAR IN DESCRIPTION TO BOULLION (SUSPECT DESCRIPTION - WHITE MALE, APPROX. 40 Y.O.A., APPROX. 6'3", APPROX. 240 LBS., MUSTACHE AND FULL BEARD, DARK BROWN OR BLACK HAIR WITH SPECKLES OF GREY).

ON 09-28-87 AT APPROX. 2000 HOURS I MET WITH MRS. MARVA SHIMKO AT HER RESIDENCE, 948 BEAN RD.

8701827		CLALLAM COUNTY SHERIFF'S DEPT. CONTINUATION REPORT		2. ORIGINAL X	3. DUPLICATE
4. STATUS MPR	5. NAME BOULLION	6. PAGE NUMBER FOUR			

INTERVIEW WITH MARVA SHIMKO: SHIMKO TOLD ME THAT BOULLION HAD STAYED AT HER RESIDENCE APPROX. 1 MONTH AND THAT BOULLION HAD MOVED FROM HER RESIDENCE ON "AUGUST 22ND 1986" ACCORDING TO SHIMKO'S CALENDAR, BECAUSE SHIMKO HAD MARKED THE DATE ON HER CALENDAR WHEN BOULLION HAD LEFT.

SHIMKO TOLD ME THAT PRIOR TO BOULLION STAYING AT HER RESIDENCE, BOULLION HAD STAYED FOR A PERIOD OF TIME AT SERENITY HOUSE.

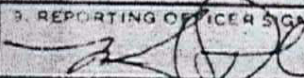

SHIMKO TOLD ME THAT BOULLION HAD ANNOUNCED HE WAS GOING TO CALIFORNIA TO VISIT HIS EX-WIFE AND DAUGHTER.

SHIMKO TOLD ME THAT BOULLION TOOK SOME OF HIS BELONGINGS AND LEFT SOME BEHIND AT THE SHIMKO RESIDENCE, ALTHOUGH BOULLION DID NOT INDICATE IF OR WHEN HE WOULD BE RETURNING.

SHIMKO TOLD ME THAT AT ABOUT THE TIME BOULLION HAD LEFT HE HAD BEEN GROWING A BEARD AND A MUSTACHE.

SHIMKO TOLD ME THAT SHE DID NOT KNOW WHAT METHOD OF TRANSPORTATION BOULLION PLANNED TO USE TO GET TO CALIFORNIA, BUT SHIMKO FELT SURE THAT BOULLION WAS NOT DRIVING A CAR BECAUSE HE DID NOT OWN A CAR AND TO SHIMKO'S KNOWLEDGE, BOULLION DID NOT DRIVE.

INVESTIGATION: I EXAMINED SOME OF BOULLION'S BELONGINGS LEFT BEHIND AT SHIMKO'S (THERE WAS NOT MUCH). BUT I DID NOT FIND ANYTHING WITH WHICH MIGHT INDICATE BOULLION'S CURRENT LOCATION.

8. REPORTING OFFICER DALE M. J.	9. REPORTING OFFICER'S SIGNATURE 	10. DATE 10-5-87	11. SUPERVISOR APPROVING	12. DATE

8701827		CLALLAM COUNTY SHERIFF'S DEPT. CONTINUATION REPORT		2. ORIGINAL X	3. SUPPLEMENT
4. STATUS MPR	5. NAME BOULLION	6. PAGE NUMBER FIVE			

I DISCUSSED THIS CASE WITH CAPT. SMITH, VIA MEMO, AND APPARENTLY CAPT. SMITH CONTACTED PETE PICCINI OF THE JEFFERSON CO. SHERIFF'S DEPT. PICCINI TELEPHONED ME AND WE DISCUSSED THIS CASE IN COMPARISON TO THE LINTON HOMICIDE.

PICCINI TOLD ME THAT HE AGREED THAT THERE WERE SOME SIMILARITIES BETWEEN THE HOMICIDE SUSPECT AND BOULLION, BUT THAT BOULLION DID NOT APPEAR TO BE LARGE ENOUGH TO BE THEIR SUSPECT. ACCORDING TO PICCINI, THEIR SUSPECT WEARS A SIZE 12 SHOE AND ACCORDING TO A SHOE I FOUND IN BOULLION'S BELONGINGS, BOULLION WEARS A SIZE 9C. BOULLION IS APPROX 5'9" - SUSPECT IS 6'3" X 140" ETC.

I HAD PREVIOUSLY INITIATED A BACKGROUND CHECK ON BOULLION BUT THE INFORMATION I RECEIVED BACK DID NOT INDICATE ANYTHING WHICH WOULD HELP IN THIS INVESTIGATION.

SMITH TOLD ME PREVIOUSLY THAT SHE HAD NO KNOWLEDGE OF A DENTIST THAT BOULLION MAY HAVE GONE TO IN THE PAST, SO I AM UNABLE, AT THIS TIME, TO LOCATE ANY DENTAL RECORDS ON BOULLION.

BOULLION HAS BEEN LISTED IN WACIC AND NCIC AS A MISSING PERSON

STATUS: OPEN, ACTIVE

FOLLOW-UP INVESTIGATION BY DETECTIVE/SERGEANT MARTIN

MISSING PERSON

3. OFFICER'S ACTIONS

On 06/20/92 I received a WACIC inquiry on this case to provide dental records. I reviewed the case and determined that it had been inactivated on 02/04/90 by Detective SNOVER. I contacted Investigator BOLLINGER of the Attorney General's Office. I had BOLLINGER run through his system BOULLION'S Social Security Number. BOLLINGER recontacted me and said that the Social Security Number has not been used in the last five years. I ran Driver's Checks in the name of BOULLION throughout the United States and found that Norman J. BOULLION did have a Driver's License in California that expired in 1986.

I recontacted his step-sister, Linda SMITH, who has had no word from BOULLION. She did have contact with BOULLION'S ex-wife who used to live in Columbia. His ex-wife has not heard from BOULLION since his disappearance.

I learned from Linda SMITH that BOULLION, upon graduation from high school in June of 1985, served two tours of duty with the Marine Corps in Viet Nam. With this information, I wrote a letter to the National Personnel Record Center in St. Louis, Missouri requesting copies of dental records on BOULLION if available. This case status will be open, active pending results from Missouri.

MISSING PERSON

SUPPLEMENTAL INVESTIGATION BY DETECTIVE DALTON

3. OFFICER'S ACTIONS AND OBSERVATIONS

In 1987 I was the original investigator for case #8701827 which is a missing person report on Norman BOULLION. At that time I was unable to develop any leads as to the location of Norman BOULLION and the case was eventually turned over to Detective SNOVER. In 1992 Detective/Sergeant MARTIN received additional information reference BOULLION and activated this case number for further investigation although the original case in 1987 (8701827) is still active.

On 10/27/93 while watching KVOZ TV Channel 12 in Bellingham, the television station broadcasted a 1987 story that they had previously shown in 1987 about a body that had been discovered in a mill smoke stack in the Bellingham area. The news report went on to say that the subject, later identified as a male was still unidentified at this time. The news story went on to further describe the unidentified male and explained that the male's body had been burned to the point where the only thing left was the skeleton. The news story then showed a reconstruction as to what the male probably looked like based upon his skull features and I noted that the male possibly resembled our missing person, Norman BOULLIN. The physical descriptors given in the news story were consistent with BOULLION along with news story described the unidentified male as possibly being Indian. I was aware that BOULLION had French Canadian descent which sometimes has Native American in it. The news story went on to explain that the unidentified body's dental work was probably done while in the military. I was aware that BOULLION had done at least one tour in the military and possibly had dental work done in the military.

On 10/27/93 I telephoned the Bellingham Police Department and requested that they send me a copy of the reconstructed photograph of their missing person along with any other items that may assist me in my investigation. The police department requested that we do what we can to obtain dental records on BOULLION which to date have not been obtained due to lack of knowledge as to which dentist may have treated BOULLION in the past.

The Bellingham Police Department faxed me copies of the information I had requested. I contacted the original reporting party, Linda SMITH, and told her I was still trying to obtain a military ID on BOULLION so I could request any medical/dental records from the military that may exist on BOULLION. SMITH told me that she would have to contact BOULLION'S mother because she had picked up all of the items left behind by BOULLION in Port Angeles and delivered them to BOULLION'S mother who now lives in the Tacoma area.

On 11/01/93 I was met at the Sheriff's Department by Linda SMITH who gave me two (2) photographs of Norman BOULLION. The first photograph

87574528

indicates that it was taken sometime in the 1980's and depicts BOULLION at a Las Vegas casino. The second photograph was taken in approximately 1965 when BOULLION enlisted in the Reserve Army. On the back of the photograph of BOULLION, taken in approximately 1965, was a notation that listed BOULLION as Private Norman J. BOULLION and also listed a number which was [REDACTED], which I believe to be his Reserve Army identification number.

Based upon that information I drafted a letter to a branch that archives military records requesting that they send any dental/medical or any other records that may be of assistance to us in our investigation. For further details refer to letter.

Re: Norman J. Boullion [REDACTED]
DOB/03-12-47 White/Male 5'9" 160 lbs Brown hair Hazel eyes

To Whom It May Concern:

In 1987, family members of former military serviceman Norman J. Boullion, reported Boullion as a missing person to our law enforcement office. Our missing person case number is 8701827.

At the time of the report, family members could not provide us with his military identification number, but in October of 1993 a family member located a military photograph of Boullion with his reserve army number listed on the back of it [REDACTED]. Already known was Boullion's social security number [REDACTED].

Family members report that Boullion was in the Army and then the Marine Corps from approximately 1965 to 1972.

Recently a skeleton was found in a neighboring county and a computer aided reconstruction of the skull into a life-like picture bears a resemblance to Boullion.

The family reports that the only known dental work that Boullion ever had was in the military.

To assist us in our investigation, we are requesting that your agency provide us with any records that may assist us in identifying Boullion. Of particular help would be dental and medical records.

Thank you for any assistance you can provide us in this case.

Sincerely,

Joseph A. Martin
Undersheriff

CRIME LABORATORY REPORT

Agency: Bellingham Police Department
Agency Rep: Dennis J. Hayes, Evidence Supervisor
Subject: Suspect - Unknown
Subject: Victim - Unknown

Laboratory Number: 104-000165
Agency Case Number: 87B24528
Request Number: 0001

Items Examined

F6218#6 right upper leg and pelvis
F6218#8 left upper leg, pelvis, and sacrum

Procedures and Results

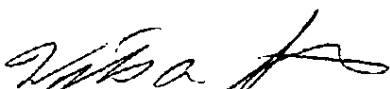

Both items (F6218#6 & #8) were found to contain piles of black matter ranging from several centimeters down to powder. The matter appears carbonized. No non-carbonized organic matter was observed.

Conclusions

The submitted items (F6218#6 & #8) are not suitable for STR DNA analysis.

Remarks

The submitted items were resealed and returned to the Washington State Patrol Seattle Crime Laboratory vault pending return to the submitting agency.

CRIME LABORATORY REPORT

Agency: Bellingham Police Department
Agency Rep: Evidence Supervisor Dennis Hayes
Subject: Suspect – Unknown
Subject: Victim – Unknown

Laboratory Number: 104-000165
Agency Case Number: 87B-24528
Request Number: 0002

Item Examined

6218 34271 one skull

Procedures and Results

Portions of the skull (6218 34271, a jaw fragment and two molars) were removed and extracted for deoxyribonucleic acid (DNA). The human DNA content of the extract was determined. The extract was amplified by the PCR (polymerase chain reaction) process using PE Applied Biosystems AmpFISTR® Profiler Plus™ amplification kit. AmpFISTR® Profiler Plus™ is a Short Tandem Repeat (STR) multiplex which tests the following genetic regions: D3S1358, D5S818, D7S820, D8S1179, D13S317, D18S51, D21S11, FGA, vWA, and Amelogenin (a gender-determination site). The amplified DNA products were analyzed using an ABI Prism™ 310 capillary electrophoresis unit.

Conclusion

No STR DNA typing profile was obtained from the skull (6218 34271).

Remark

The submitted item was resealed and returned to the Washington State Patrol Seattle Crime Laboratory vault pending return to the submitting agency.

VIEWPOINT

Bellingham's cold case: Police seek help identifying G-P skeleton

DEAN KAHN
THE BELLINGHAM HERALD

Do you know this man?

Look closely.

If you can identify him, you could help close the book on what may be Bellingham's oddest unsolved mystery.

Nineteen years after the man's charred remains were found, three basic questions remain:

- Who was the Georgia-Pacific West Inc. skeleton?
- How did he end up inside a metal chimney high atop G-P's steam plant?
- Why was he there?

A worker checking for a possible water leak found the body on Sept. 20, 1987.

"I think of it very frequently," said Orman Darby, retired G-P spokesman. "It puzzles me."

Two images of the man were drawn years apart, in 1987 and 2000, by different artists. They represent independent guesses of what he looked like, based on his intact skull.

Police estimate he was 5 feet 8 inches to 5 feet 9 inches, from 130 to 155 pounds. They think he was 20 to 40 years old.

His crumpled skeleton was found atop parallel pipes near the bottom of the chimney. The pipes, which carried water heated by boiler exhaust, were 240 degrees. The air was 95 degrees, unless the boiler was running, when temperatures reached 370.

Officials estimated he had been in the chimney a few days to a few weeks. Records showed the boiler operated for 34 hours during Sept. 17 and Sept.

CAN YOU HELP?

If you have information about the G-P skeleton, call Bellingham Detective Al Jensen at 676-6920. The case number is 87B-24528.

18, two days before the body was found, plus more hours the previous month.

Police found charred remnants of denim pants and a denim jacket, a lightweight shirt, and rubber-soled shoes. The coat was off and under the body, apparently to shield him from the heat. The shirt was draped or wrapped around one ankle, possibly to bind an injury.

Police also found a burned remnant of a Continental Airlines ticket, but there weren't enough numbers visible to trace the ticket.

The man had had dental work, including fillings and possibly a root canal.

Equally important was what he didn't have. No keys. No ID. No wallet. No ring. No watch. No clothes or tools indicating he was a worker.

No missing workers were reported. No abandoned vehicle was found.

Police worked the case until 1993, then set it aside. Six years later, Detective Al Jensen reopened the investigation after a department employee training to become a forensic artist used the skull to create the short-haired image.

Jensen sent physical details about the man to agencies around the country to see if they matched missing-person reports filed a year before to a year after the body was found. No luck.

Then he sent the details for a possible match to missing-person reports filed in a six-year window - three years before to three years after - around the country and in Canada. A possible match involved a man missing from Vancouver, B.C.

Alas, there were no dental records for him, no evidence that he had crossed the border, and no chance to compare DNA because the chimney heat destroyed DNA in the skeleton.

"I really haven't given up on this case yet," Jensen said. "I still watch it."

HARD TO GET THERE

Perhaps the biggest mystery is how the man reached the chimney. The chimney is gone now, replaced years ago when G-P installed equipment to catch pollutants, but I visited the site back in 1987.

The skeleton's broken legs, ankle and pelvis indicate he entered from above, not through a side hatch near the bottom.

To get there, he had to climb three flights of stairs, or ride a conveyor belt, inside the steam plant, then exit a door onto the roof.

The chimney was 10 feet square and just more than 17 feet high, nestled close to a brick wall and some support structures. The opening on top was about 4½ feet wide. The opening wasn't visible from the catwalk at the base of the chimney, but the lid was visible if it was up.

A person could reach the hole by using a ladder from the catwalk, or by scrambling up pipes and other handholds. Or a person could jump from a nearby roof onto a corrugated metal roof on a small structure next to the top of the chimney.

87B-24528

A ladder affixed to a wall went past the small structure, but the ladder had a protective metal cage, so anyone using the ladder would have had to climb outside the cage, then leap toward the top of the chimney.

Did the man fall in by accident? Commit suicide? End up there as a murder victim?

"You can go round and round and round on it and still not have much," Darby said. "I will always wonder."

Reconstructions of Victim

Unidentified Male

- The victim was discovered on September 20, 1987 in Bellingham County, Washington
 - Estimated Date of Death: A few days - a few weeks
 - Charred Skeletal Remains
-

Vital Statistics

- **Estimated age:** 20 - 40 years old
 - **Approximate Height and Weight:** 5'8"-5'9"; 130 - 155 lbs.
 - **Dentals:** The man had had dental work, including fillings and possibly a root canal.
 - **Clothing:** Police found charred remnants of denim pants and a denim jacket, a lightweight shirt, and rubber-soled shoes. The coat was off and under the body, apparently to shield him from the heat. The shirt was draped or wrapped around one ankle, possibly to bind an injury. Police also found a burned remnant of a Continental Airlines ticket, but there weren't enough numbers visible to trace the ticket.
 - **DNA:** The chimney heat destroyed DNA in the skeleton
-

Case History

The victim was located inside a Georgia-Pacific West Inc. chimney. A worker checking for a possible water leak found the body on September 20, 1987. His crumpled skeleton was found atop parallel pipes near the bottom of the chimney. The pipes, which carried water heated by boiler exhaust, were 240 degrees. The air was 95 degrees, unless the boiler was running, when temperatures reached 370.

Officials estimated he had been in the chimney a few days to a few weeks. Records showed

the boiler operated for 34 hours during Sept. 17 and Sept. 18, two days before the body was found, plus more hours the previous month.
No keys, ID, wallet, ring, watch nor clothes or tools indicating he was a worker were located.
No missing workers were reported and no abandoned vehicle was found.
Two images of the man were drawn years apart, in 1987 and 2000, by different artists. They represent independent guesses of what he looked like, based on his intact skull.

VIEWPOINT

Man wonders if G-P skeleton was a woman**Retired steam engineer offered tour of G-P plant**

DEAN KAHN

Richard Severson still wonders if the person found inside a Georgia-Pacific chimney 19 years ago was a woman he guided through the steam plant at Western Washington University.

Odds are the victim was a man, based on a doctor's examination of the charred skeleton and on burned remnants of masculine-style clothing.

The identity of the person — and how and why the person ended up inside a hard-to-reach chimney atop G-P's steam plant — remains one of Bellingham's enduring mysteries.

During the woman's tour of the campus plant, she asked to climb inside a boiler, and went inside an inactive boiler several times, said Severson, 77, a steam engineer who retired from Western in 1993. Partly to encourage her to leave, he mentioned the waterfront plant with boilers that's visible from campus, presuming that G-P was secure from intruders. Not long afterward, a few weeks to a few months, Severson read news reports of the skeleton's discovery.

"I still feel a little bit responsible," he said.

Robert Gibb, who studied the remains as deputy medical examiner, is confident the victim was male. His autopsy report includes numerous measurements of the intact, blackened pelvis.

Studying the pelvis is a standard way to distinguish between skeletons of men and women. A woman's pelvis is broader and lighter than a man's, with a wider pelvic cavity.

One medical authority puts the accuracy of determining sex using the pelvis at 95 percent, which does leave some margin for error.

A worker checking for a water leak found the body on Sept. 20, 1987. Police estimate the victim was 5 feet 8 inches to 5 feet 9 inches, 130 to 155 pounds, and 20 to 40 years old.

The skeleton was lying on hot pipes more than 17 feet below the top of the chimney, where a lid provided entry. The air inside reached 370 degrees when the boiler was running.

There was no ID with the body, only part of an airplane baggage ticket that couldn't be traced. Police found remnants of denim pants, a denim jacket, a lightweight shirt and rubbersoled shoes. Dental records and surveys of missing men elsewhere have not produced a match.

Severson, a stout, talkative fellow who lives on Lummi Reservation, says the white woman entered the campus steam plant during the summer or early fall, because the weather was warm and a door was open.

She was wiry, perhaps 5 feet 4 inches to 5 feet 6 inches, and in her mid-30s to mid-40s, he said. She had light- to medium-brown hair that was cut short, and wore a lightweight lined windbreaker, a woven blouse, women's jeans and tennis shoes, possibly blue, he said.

She entered the steam plant and smiled, but didn't speak first, Severson recalled.

"I said, 'Do you want a tour?'"

She nodded yes, so he showed her the boilers, controls and pumps on the main floor. When they came to a small boiler that was operating, she asked "Can I go in there?"

To make her convinced that the boiler was running, he lifted her up so she could see the flames through a small window.

She again said she wanted to go inside, so Severson escorted her up some stairs to an entry into an inactive boiler. Curious to see what she would do, Severson opened the door and watched as she climbed inside and huddled atop some pipes.

87B-24528

She got out, and then went in and out of the boiler another four to five times. He then asked her to leave.

Severson said he went to police headquarters after seeing news stories about the skeleton. He said he talked with two policemen, whom he presumed to be a detective and another officer, about the woman, but they didn't show much interest because doctors had decided the victim was a man.

"I hope they're right," Severson said, "because I don't want that on my conscience."

Subject Validating 87B24528

Hi Al,

I am in the process of validating files.

The file that I am validating is the unidentified person deceased in which the remains were found down at GP.

I see that there is no follow up since March 2008 wanting to check with you I see that on the teletype cause of death is listed as Unknown Hypothermia.

Is that something that was noted by Medical Examiner?

I am updating the phone number for Medical Examiners Office to reflect (360) 738-4557.

Let me know so that I can complete the process.

Thank You

Karen L

NEWS RELEASE

City of Bellingham, Washington 98225

POLICE DEPARTMENT

FOR RELEASE: (DATE) September 23, 1987

FOR FURTHER INFORMATION, CONTACT: Chief Dan Fitzgerald

SUBJECT: CLUES EMERGING IN INVESTIGATION OF SKELETAL REMAINS

Bellingham. - Dr. Robert Gibb and personnel from the Bellingham Police Identification Unit have made some discoveries concerning the characteristics of the skeletal remains found in the chimney of Boiler #9 at G-P. The victim was male, 5'-8"-5'9", probably weighing between 130-155 lbs., and was between 20-40 years of age. He had a small foot, probably wearing approximately an 8 shoe size. The clothing worn was not that of a typical workman. The victim had good dental work - there were a number of porcelain and gold fillings and evidence of a root-canal.

Dr. Gibb has been in contact with the Medical Examiners office in King County, according to Chief Dan Fitzgerald, to try to draw some conclusions as to how long the body may have been in the chimney. At this point, we believe that the time span may be from a few days to a few weeks.

Chief Dan Fitzgerald encourages anyone who is aware of a missing person within this community who meets the general description given to call the Bellingham Police Department, 676-6925.

The investigation will continue.

FOR FURTHER INFORMATION, CONTACT: Chief Dan Fitzgerald

SUBJECT: INVESTIGATION CONTINUES

Bellingham. - Bellingham police continue their investigation into the identity of the human remains found inside the chimney of G-P's #9 boiler. Dr. Robert Gibb and members of the Police Identification Unit worked yesterday assembling the remains.

Later this morning an odontologist will work up a dental chart on the remains. The subject appears to have had good dental work. It is hopeful that identification can be made using this method.

There is no evidence of violence in the bone structure at this point, according to Chief Dan Fitzgerald.

Police have checked both with G-P and private contractors, and they have each been able to account for all of their past employees. G-P also reports that all paychecks have been picked up and they have no missing employees. Chief Dan Fitzgerald reports that the police will be checking on the whereabouts of all employees that have left their employee since December of 1985..

The time of death has been difficult to determine because of the extreme heat generated by the boiler. G-P will be furnishing a chart indicating the times that the boiler has been in operation since 1985.

NEWS RELEASE

City of Bellingham, Washington 98225

87 24528

POLICE DEPARTMENT

FOR RELEASE: (DATE) September 21, 1987

FOR FURTHER INFORMATION, CONTACT: Captain Duane Schenck

SUBJECT: HUMAN REMAINS FOUND INSIDE BOILER AT G-P

Bellingham. - Bellingham Police were called to G-P at 5:50 a.m. Monday morning, September 21st on the report that as a G-P employee was conducting a routine check of a large boiler, inside he discovered the skeletal remains of a human being.

It is unknown at this time how the person managed to get inside the boiler. It is normal for this particular area to go unchecked for considerable periods of time, since there are seldom any problems. G-P does not have any missing employees.

Officers of the Bellingham Police Department's Identification Unit along with Dr. Gibb, collected items of evidence from inside the boiler after G-P officials unbolted the access plates. The normal temperatures within the boiler are 350-400 degrees, thus making this a difficult task.

Investigating officers from the Police Department, with the assistance of personnel from G-P, will be contacting contractors who have done work in the past for G-P in an attempt to identify the victim, according to Chief Dan Fitzgerald.

TR

POLICE DEPARTMENT

FOR RELEASE: (DATE) September 24, 1987

FOR FURTHER INFORMATION, CONTACT: Chief Dan Fitzgerald

SUBJECT: BELLINGHAM POLICE CONTINUE INVESTIGATION IN SKELETAL FIND

Bellingham. - Members of the Bellingham Police Investigative Unit are continuing their efforts to identify the skeletal remains found in boiler #9 at G-P. They were unsuccessful in an attempt to match dental records of one county missing person.

Chief Dan Fitzgerald reports that a cluster of papers was recovered from the ashes, which we suspect to be the contents of a wallet. The FBI Lab in Quantico, Virginia was contacted, after which it was decided to try to reproduce the writing on the charred paper by use of the latest methods of ultra violet and infrared photography. This process is presently underway within the Bellingham Police Department's Evidence & Identification Bureau.

It has been determined that the clothing worn by the victim was a denim-like jacket and pants, according to Chief Fitzgerald.

At this point, attempts to identify the skeletal remains are stymied due to the lack of reported missing persons.

This will be the last news release on this case until we have some specific information.

NEWS RELEASE

City of Bellingham, Washington 98225

87-24528

POLICE DEPARTMENT

FOR RELEASE: (DATE) December 11, 1987

FOR FURTHER INFORMATION, CONTACT: Chief Dan Fitzgerald

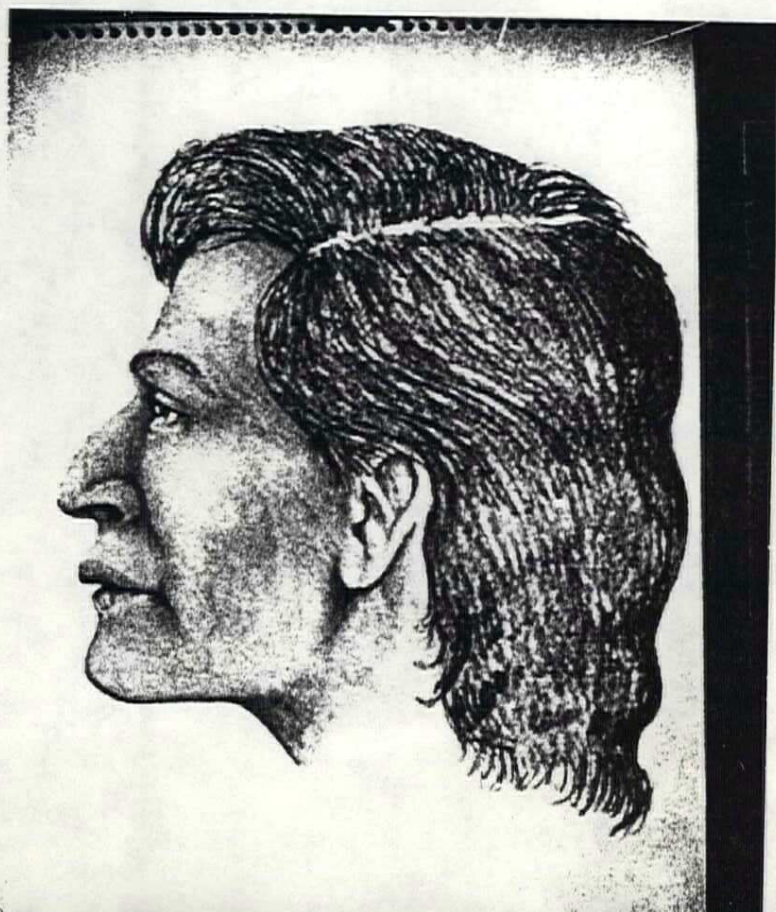

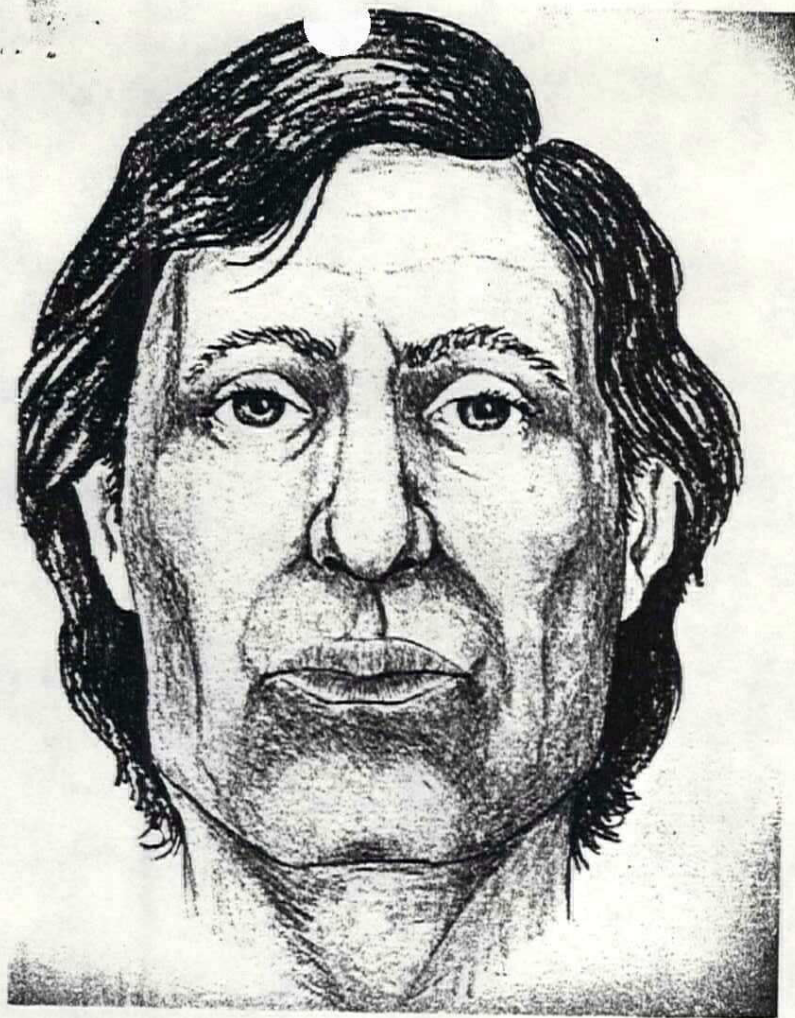

SUBJECT: NEW INFORMATION RELEASED ON SKELETAL REMAINS FOUND IN GP CHIMNEY

Police this morning released a preliminary sketch of the facial features of the victim from the skeletal remains found in Georgia Pacific's chimney boiler on September 21, this year. The case still remains a mystery to Bellingham Police. Skeletal remains found in the chimney were believed to have been a male victim 5'8" to 5'9", weighing between 130 and 155 lbs. and between 20 and 40 years of age wearing approximately a size 8 shoe. The victim had good dental work and there were a number of gold fillings and evidence of a root canal. Neither Georgia Pacific nor any of the contractors have had a missing person. We have been unable to match the remains of any known missing person.

Exact measurements and photographs of the skull were sent to Mr. Harvey Pratt of the Oklahoma State Bureau for identification. He in turn constructed the facial features based upon the bone structure of the skull.

Police are again asking for any information on missing persons or information on people that you may have seen that meet the general features of this facial reconstruction.

Dear Sir

In September 1987 this agency discovered the skeletal remains of a male at a local industrial plant. The victim was a male, small stature, 5'8" to 5'9". The victim had good dental work with a number of porcelain and gold fillings and evidence of a root canal. The dental work may have been done at a military clinic.

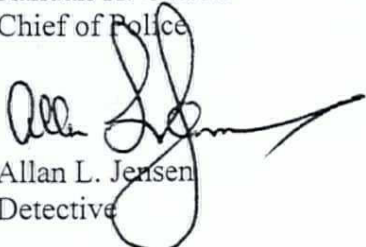

An NCIC off line search reveled an open missing person case under your case number 870030911 that matched the search perimeters for the skeletal remains. I have attached the dental records for this unidentified subject and ask that they be compared to your missing person file. A limited clothing description is available upon request.

Please advise me of the results of this comparison. If I can be of any further assistance, please feel free to call me at 360-676-7683.

Thank you in advance for any assistance that you can provide in this investigation. Reference our case number 87B-24528.

Gentlemen:

My daughter recently saw a news item about an unidentified person who was found in a chimney at an industrial plant near Bellingham. She was almost asleep and so is not certain about what she saw on TV. Could you send me a copy of the artist's sketch and any further information you have.

If we are able to identify the person, we will supply you with information that will enable you to check dental records.

Sincerely yours,

Sally Ann Mowrey

Dear: Officer Gottschalk

UNIDENTIFIED PERSON, WAC # 880000001

The Washington State Patrol Missing/Unidentified Persons Unit received an unidentified person report from your agency, case number 87B24528.

Our Forensic Dental Advisor has just completed a review of this file. As a result, it is requested that you please furnish the following information:

- (XX) Dental x-rays (originals are preferable for identification and accurate coding for computer searching; if only copies are available, please note left and right side). Full Mouth x-rays are needed.
- () Dental charts.
- () Other:

The dental information is requested in accordance with RCW 68.50.330 and is necessary for the exclusive purpose of assisting in the investigation into the identification of the person.

Please forward the requested information to: Washington State Patrol, Missing/Unidentified Persons Unit, Attn: Ms. Toni Wentland, QE 02, Olympia, WA 98504.

Thank you for your assistance. If you have any questions, please call Ms. Wentland at 753-1533.

The victim had good dental work with a number of porcelain and gold fillings and evidence of a root canal. The dental work may have been done at a military clinic.

An NCIC off line search reveled an open missing person case under your case number 862884 that matched the search criteria for the skeletal remains. I have attached the dental records for this unidentified subject and ask that they be compared to your missing person file. A limited clothing description is available upon request.

Please advise me of the results of this comparison. If I can be of any further assistance, please feel free to call me at 360-676-7683.

Thank you in advance for any assistance that you can provide in this investigation. Reference our case number 87B-24528.

Sincerely

Randall H. Carroll
Chief of Police

Allan L. Jensen
Detective

Seattle Post-Intelligencer

RECEIVED FROM
CHIEF CARROLL
01/04/2002

December 26, 2001

Bellingham Police Department
Chief Randy Carroll
P.O. Box 1278
Bellingham, WA 98227

Dear Chief Carroll:

I request access to public records under RCW 42.17, the Washington Open Public Records Act, as follows:

All incident or initial reports related to open missing persons cases and all unsolved homicide cases on file with your agency since 1980. The *Post-Intelligencer* would like to obtain copies of all available reports and documents related to this case, and agrees to pay reasonable search, copy and postage. However, if costs are expected to exceed \$50, please contact me beforehand.

As you know, the law demands a liberal interpretation to promote "full access to public records". Segregable parts of otherwise exempt records must be released. Denial of any part of this request must be accompanied by a written statement of what is being denied and the specific reasons therefore, subject to judicial review and imposition of penalties and costs for wrongful denial, including our attorneys' fees.

The law also requires a prompt response to this request. If you have any questions at all regarding this request, I can be reached at 448-8062.

Thank you for your help.

Sincerely,

James G. Wright
Assistant Metro Editor
jameswright@seattlepi.com

Released primary by Gottschalk dated 9-20-87.

REFERRAL

RE:

Boullion Norman John

THE REPLY TO THE INQUIRY WILL BE FOUND IN THE CHECKED ITEM(S).

- ☐ Copies of the requested military personnel records are enclosed. We suggest you make an extra copy of each page and guard against loss or damage. We regret if any photocopies may be of poor quality, but they are the best copies obtainable.
- ☐ The enclosed separation document may contain the following information: authority for separation, reason for separation, reenlistment eligibility code, and separation (SPN/SPD) code. If you require a copy of the separation document that does not contain the above information, you may request a deleted copy from this Center.
- ☐ The requested health record was not retired to this Center. The military service department now sends health records to the Department of Veterans Affairs (VA) Records Management Center (RMC) or, if a VA claim was filed, to the VA Regional Office that serves the veteran's local area. We have forwarded your inquiry to the RMC to locate the record and either respond to you or forward your inquiry to the appropriate office. You do not need to write again concerning the requested health record, but if you do so, address the correspondence to the RMC, P.O. Box 5020, St. Louis, MO 63115-5020.
- ☒ ^{Dental} The medical records/x-rays requested have been lent to the Department of Veterans Affairs (VA). Please phone the VA at 1-800 827-1000 for help in obtaining these records, and furnish your VA Claim Number, [REDACTED].
- ☐ Please contact the Department of Veterans Affairs (VA) Regional Office that serves your local area. The telephone number is 1-800 827-1000. That agency is responsible for making decisions about cases of this type. If necessary, the VA will request data from the military personnel and medical records on file at this Center.
- ☐ Your request for photocopies of your health record indicates that you plan to use the copies to file a claim with the Department of Veterans Affairs (VA). It is not necessary to provide copies of your health record to the VA when you file a claim. After you file, the VA will request your original health record from this Center. For this reason, we have avoided the time-consuming process of copying your health record. If you still want the copies for your own personal use before you file a claim, please write to us again and enclose this form. Your request will then be answered as quickly as possible.
- ☐ We believe that the Department of Veterans Affairs (VA) may possess evidence of your possible eligibility for VA benefits. We suggest that you contact the VA Regional Office that serves your local area. That office can be reached at 1-800 827-1000. Please furnish your VA Claim Number, _____.
- ☐ The military service records of the person named above show that a claim was filed with the Department of Veterans Affairs (VA) at the time of separation from service. The medical records may have been sent to the VA at that time. We suggest that you contact the VA Regional Office that serves your local area for assistance in locating the requested records. That office can be reached at 1-800 827-1000.
- ☐ The medical records/copies/x-rays that you requested are enclosed.
- ☐ Your inquiry has been forwarded to the office shown below for consideration. Any further correspondence pertaining to this matter should be sent to that office.
- ☐ Matters of this kind are under the jurisdiction of the office shown below. Please contact that office.
- ☐ For information concerning enlistment or reenlistment, please contact the nearest recruiting station of the branch of service in which you are interested.
- ☐

Date: 3/9/00

Subject RE: Case #87B24528 - copy of dental x-rays and WSP MPU Mailing Address

Hi Detective Jensen,

Just following up to let you know: our Forensic Dental Consultant, Dr. Gary Bell, responded back that he can indeed make a copy of the dental x-rays in his office.
Would you be willing to mail the dental x-rays for Unidentified Case # 87B24528 (NIC# U270367134) to me, using the mailing address below?

I would estimate that the dental films would be needed for ~3-5 weeks to allow Dr. Bell's office time to make the copy, and then I would be responsible for ensuring that the original x-rays would be returned to you via mail.

Also, if Ok and we move forward with the copying, could you confirm that this would be the appropriate mailing address for us to return the films to you?

Bellingham Police Department
Attn: Det. Al Jensen
505 Grand Avenue
Bellingham, WA 98225

If there is any paperwork I would need to sign to indicate that I've checked out the dental x-rays for making a file copy for WSP's Missing Persons Unit, please let me know. I hope to hear from you soon.

Sincerely,

Carrie Shelton

To: 'AJensen@cob.org'
Subject: WSP MPU Mailing Address

Hi Detective Jensen,

Thanks very much for your assistance and the extra time you spent in locating the dental x-rays! I really appreciate your help. Below is my mailing address. If you are able to duplicate the x-rays before I do, could you mail me a copy for our case file?

I emailed Dr. Gary Bell (our forensic odontologist who is reviewing all the unidentified dental records prior to us sending them to the FBI's national database called LEO – Law Enforcement Online) to ask if

he can duplicate the dental x-rays that you located for case #87B24528, and will keep you posted on his response. :0)

Sincerely,

Carrie Shelton

NARRATIVE: At about 0550 hrs., I was dispatched to G.P. on the report that a skeletal remains had been found inside of a boiler. I arrived and was contacted by Harris and by Darby. Harris said that he had received a smoke alarm on the #9 boiler and had gone to investigate. This usually means that a steam pipe is leaking. This particular area has a series of pipes running through the boiler which are used to preheat steam. It is normal for this area to go unchecked for considerable periods of time as there are few problems. Regular access to the boiler is from the top where a large lid is usually left open. This allows easy viewing of the inside. There are also 2 steel plates lower on the boiler which

can be unbolted to get in. As Harris looked down into the boiler he could see a decomposed skeleton laying on the first layer of pipes about 17' down. There is a crossbar about 7" down going completely across the boiler. From rim to rim diameter of the boiler at the top is 4'6". There are 11 pipes at the 17' level. Under these are other layers of pipes of similar type. The body was laying on the top layer. There is a small outcropping from about 5' above the first layer of pipe above the first plate opening. There is a small rod sticking out about 3' just below the first plate opening. This is the housing for a temperature guage. The boiler is cylindrical in shape from the top rim to about 6' from the top layer of pipes. At that point it flairs out considerably. Harris called the police department and also the plant supervisors. I took photos of the scene, the general area and specifically from the top of the boiler. I contacted ID Supervisor KNUDSEN and he suggested I call out ID OFFICER NOLTE and notify Dr. GIBB. I did so. It took about 1 1/2-2 hrs., to get the access plates off of the boiler. I took a complete series of photos on the Canon color. Off. NOLTE arrived and we videotaped the entire scene inside and outside. When we had finished we recalled Dr. GIBB who came to the scene. Dr. GIBB went inside the boiler first and collected the majority of the body parts that were identifiable. He then left and I entered the boiler and continued collecting clothing and anything else that may possible been of evidentiary value. I was advised that the normal temperature within the boiler was 350-400 degrees and a great deal of air moves through the pipes. As a result the body had been greatly decomposed and it was difficult to collect the items as individually as usual. All the collected items were brought in and impounded in the evidence locker by ID OFFICER NOLTE.

I also contacted Prosecutor McEachran, and advised him of the situation. I took a statement from HARRIS as to what he did and saw. Dr. GIBB said he would contact the ID section tomorrow about reconstruction. Dr. GIBB said he called Dr. ROOD and told him of the situation.

At this point GP is unaware of any missing employees. They do have private contractors that come in to do work. It is a possibility that it may have been one of them. I did find a welders striker in the area where the remains were laying. If the striker belonged to him it may help in identifying him. GP supervisors were advised that personal from the detective division would be contacting them tomorrow.

They will be happy to cooperate.

EVENT NUMBER

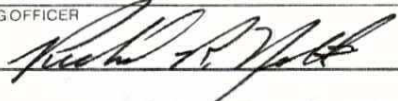

OFFENSE / EVENT DESCRIPTION	DATE	<input type="checkbox"/> CONT. NARRATION <input checked="" type="checkbox"/> FOLLOWUP ONLY	EVENT NUMBER
DEAD BODY	9-20-87		87B 24528

The time is 1407 hours.

At approximately 0645 hours this officer received a telephone call from Inves. Paul GOTTSCHALK. This officer was at his home. He indicated that he had been in contact with i.d. & evidence supervisor Bob KNUDSEN who had requested that I be called out to the scene of a found dead body in a heat exchanger in the boiler of the steam plant at GEORGIA-PACIFIC. I proceeded from my home to BPD where I picked up some additional video equipment and items. The evidence VAN and proceeded to GP. There I made contact with Officer GOTTSCHALK who took me to the scene of the dead body. He went through the circumstances on how the body was discovered. He indicated to me that some-one in GP had received some sort of an alarm. They had responded to the top of the smoke stack type tower to check on the exchanger, looked down inside, and there saw the skeletal remains of a human being. He took me up to this tower, smokestack arrangement. We looked down inside and it was easily identifiable as human remains, what appeared to be almost an entirely human skeleton. By the time we finished with our discussion, went down below. An access door had been removed directly above the piping which runs through the exchanger which gave us direct access to the skeletal remains. Additional photographs were taken. The video camera was used to take a video of the scene and a closer examination of the remains was done. It appeared to be almost an entire skeleton, very little if any flesh remaining. It was very warm in this chamber. In speaking with the supervisors who had responded it was determined that the average operational temperature of this exchanger for the boiler is about 400 degrees. Further conversation with the management, the story is that the boiler was shut down. An employee was monitoring the circular type graphs that they have. Observed some glitches on the particular graph dealing with this exchanger which would indicate some sort of smoke or misting in the chamber. He responded to check it out in as much as the boiler had been turned down. He expected to find maybe a leak in one of the pipings. He got up there to the top of the stack, looked down, and observed the skeleton and called it in.

Dr. GIBB was called to the scene after we had finished our preliminary investigations. He was briefed. He entered the chamber. Officer GOTTSCHALK was at the entry way and I was down below. Dr. GIBB went through and removed body parts, placed them in a bag. They were passed down to me and I logged them and marked them and is currently under impound under impound #F 6218. These items will be taken to Dr. GIBB's office on 9-21-87 for further examination and reassembly. At this point in time DR. GIBB can make no determination as to cause of death. He cannot eliminate homicide nor can he eliminate accidental.

After Dr. GIBB had finished his collecting of body parts, Officer GOTTSCHALK then entered the chamber. We continued our search of the materials inside. Additional

items were gathered. Additional clothing items were gathered. Some extra bones were found. A device commonly referred to as a striker used by welders to light acetylene or gas torches was also located. Some samples of the slag material found in the chamber were also gathered. We had placed a piece of black visqueen underneath the chamber below where the pipes were to catch any items that sifted through as we sifted the material left in the chamber. This was also impounded.

This concludes the details of this report.

NARRATIVE: On 9-21-87 at approx. 1423 Hrs. Lt. Miles & I went to the Steam plant at G.P. At the Steam plant we contacted C-1 BAILEY the Steam plant superintendent. Bailey advised the last work on Boiler #9 was done 12-30-85. This work was done by a sub-contractor. G.P. repaired the economizer (Pipes) in boiler #9 Apr. 30th 19. Bailey advised the temp. in #9 with it under fire would be approx. 400° F. He stated he has records showing when #9 was fired & when off. He stated these records go back 1 year. He stated

He would let me know when #9 was fired. Mr. BAILEY advised All of his employees are accounted for. Mr. Bailey called C-2 into his office (Asmundson). Asmundson advised that Industrial Chimney Co repaired a chimney close to boiler #9 & Asmundson requested they do an inspection of some equipment near Boiler #9. I was given a list of the employees from that company & a contact of John Neilson. I called Neilson & he advised all of these employees are accounted for. Neilson also advised they used 4 laborers out of the B'ham Local. I checked w/ the B'ham Local & all 4 of these laborers are accounted for.

Mr. BAILEY called Dick GUNDERSON C-3 & had him come to his office. Mr. Gunderson of Wright SCHARF Harbor Inc. is a sup contractor that has his office in a trailer off Chestnut on G.P. Property. Gunderson advised they have had many employees working here. He advised all sheets have been picked up. He advised that all the employees back to Dec. 1985 will be checked. He later called & advised all are accounted for.

Mr. Bailey advised that the Lid on stack #9 is always open. He advised they burn Gas in Boiler #9. If oil is burnt in #9 they would close the lid to this short stack & the smoke would automatically go to a tall stack. This is done to put the Sulfur out higher. He advised they haven't used oil in years. Bailey advised Elmer CRAPE ext. 232 would be the person to contact to see if any vehicles were left in the parking lot & impounded. CRAPE advised none have been impounded. He also said they haven't found any they think are abandoned.

Mr. Bailey advised that if someone had dumped a body in #9 it would be a good place. He said you would have a better chance on winning the Lottery than having someone look down Stack #9.

Dead Body.

9-24-85

On 9-24-87 at approx 1000 HRS. I called Mr. BAILEY & asked the temp. of the steam pipes that the Body was on. MR Bailey called back & advised approx. 240° on the top row of pipes. The top row of pipes are where the recovered water enters #9 & the temp there is approx. 240°.

On 9-23-87 I received a followup from off GOTTSCHALK. He talked w/ a Mr. MERRILL from Ore., who had heard on the news about this case. MR. MERRILL was concerned of The report of high levels of Dioxin in the Boilers. In the report it didn't say if MERRILL was with any agency so I called him. He advised he is a 3yr. Law student. That he gets involved in Ecology cases. He advised he has worked w/ Green Peace & stopped the forestry from spraying poisons in the forests. He advised his wife is a Science writer & her name is Carol VAN STROME.

On 9-24-87 I called ORMAN DABBY the P.R. man a GP 676-7205. I asked if G.P. had had any problem w/ Green Peace or any other Ecology organization because of Dioxin or anything else. He advised no problem with anyone. He advised paper mills are not where the Dioxin problems are. I asked if someone would enter the Boiler to get evidence of Dioxin or any pollution. He advised no. They would go to the Hog fuel ash pile that sits in the open & anyone can get to.

Contact Complainant = Julius, Haynes Rodney 734-9953

Julius on 12-21-87 Called to report that he has not heard from or had any type contact with a below named cousin and felt it may be related to the body found at Georgia Pacific on Sept 20th 1987.

Morris, Joseph Kirby
DoB 2-9-49
male / Indian BPD file #16003

Investigation reveals that Morris was identified by 2 persons on 9-27-87 on the Lummi Reservation according to Bruce Haley of Lummi law and order. According to Haley, Morris is suspect in a sexual abuse incident regarding a juvenile which allegedly occurred on 9-27-87 and reported 9-29-87. case #87I-4530.

Dates would tend to eliminate Morris as being the body in question.

Julius notified of findings.

On 09-25-91 the attached letter was refereed to me by Inv. Gottschalk. It is in ref. to the body found in the smoke stack at G.P.. I called Ms. Wentland at the number provided and explained to her what the condition of the body is in and that the x-rays She had on file is the best we can provide.

Ms. Wentland has requested a copy of the Medical Examiner's report. I have made a copy and forwarded it to her Office.

Enclosed is the photos of our unknown skeleton and the missing person report. The height is accurate within an inch or so, however, there is no way to guess at the weight as there was no flesh left.

If there is anything else you need, please call us.
Thank you for the assistance in this matter.

Sincerely,

Daniel L. Fitzgerald

Dear Sir:

Skeletal Remains

We took the dental records you provided us and had them compared with the dental records of our missing person. Dr. Tom FARNSWORTH concluded that they were not from the same person.

If you require any further information, contact the investigator in this matter, Cst. Charles Lair.

Yours truly

Attention : Detective Allan L. JENSEN

Re: Found Skeletal Remains

Your letter dated May 31st, 2000, refers.

As requested a comparison of your dental records and the records on file our point was conducted by a Forensic Odontologist. Subsequently the comparison/examination determined that they are **NOT** the same person. Therefore our file can be eliminated from your investigation.
